## Online & on GUARD

By Adrenna Benjamin  
MUSTANG DAILY STAFF WRITER

With technology on the rise, more and more people are meeting significant others online, instead of in person. Chatting online can be a fun way to meet people, but it can also be a dangerous place to give out personal information.

A lot of dangers exist in chatting online with someone and then meeting them in person. It's a common scenario: A girl is chatting online and decides to meet with the person she's been chatting with. She goes to the arranged meeting and is never heard from again.

"There are a lot of dangers while chatting online," said Julie Martin, a channel manager of an Internet company, on her Web site. "Anyone can get your information if they wanted to."

On her Web site, Martin explained that what a lot of people don't understand is that the smallest amount of information casually given away can be very dangerous.

"If you see a screen name in the chat room and

## Tournament aims to raise mental health awareness

By Erica Tower  
MUSTANG DAILY STAFF WRITER

An important Cal Poly tradition continues Friday at noon at the Rec Center with the third annual Mark S. Reuling Memorial Volleyball Challenge to benefit Health and Counseling Services.

The event, open to all campus clubs, students and faculty, will honor the memory of Mark Reuling, a former Cal Poly student who took his own life. It will also raise money for an endowment aimed to increase awareness about depression and bipolar disorder, also known as manic depression.

"It's a fun event for a good cause," said Bob Negranti, counseling services administrator. "All of the money we raise goes directly back to the students."

Reuling, a 1989 Cal Poly construction management graduate, committed suicide in 1996 after struggling with both depression and bi-polar disorder. Reuling's twin brother also suffered from both conditions but received treatment. For Reuling, however, help came too late.

After Reuling's death, his parents

*"This disease is much more common than people think. The symptoms usually first appear in the college-age years."*

Anne Goshen  
Cal Poly counselor

created an endowment in his honor to fund mental health education, and initiated the idea for an annual fundraiser. The benefit eventually assumed the shape of the annual Volleyball Challenge, because Reuling was an avid volleyball player while he attended Cal Poly.

The memorial tournament will be held in conjunction with a presentation on mental health this Friday from 10 to 11 a.m. at the Albert B. Smith Alumni and Conference Center.

Anne Goshen, Ph.D., Cal Poly professor and counselor, will speak about the types and causes of mood disorders, how to recognize depression in yourself or someone you know, and the variety of treatments currently available.

"This disease is much more common than people think," Goshen said. "The symptoms usually first appear in the college-age years."

She also stressed the importance of student education and awareness about depression and bi-polar disorder.

see **TOURNAMENT**, page 4

## Students start search for rental housing

By Larissa Van Beurden  
MUSTANG DAILY STAFF WRITER

Although it's only winter quarter, many students are already looking for a place to call home next year.

There is a major housing crunch in San Luis Obispo, with more students than available affordable housing. With an even greater number of incoming freshmen next year, combined with a limited number of on-campus dorms, students are starting early to find affordable housing, preferably close to campus.

Julia Arnerich, an art and design freshman, lives in the dorms this year, but hopes to move off campus next year. She hasn't started looking for a place yet, but has an idea about where she wants to live next year.

"We're hoping to lease at Mustang (Village) next year," she said.

Mustang Village is a popular location for students because of its proximity to campus. Since houses close to campus fill up fast, some people will live almost anywhere, as long as they have a roof over their head.

Ellie Malykont, a property manager at California-West, Inc., said students have already started calling for lists of next year's housing.

"The list comes out May 1," she said. "But we have actually started receiving calls from students for about the past month."

Malykont said the craziest time for her office is from May 1 until mid-September, but she gets calls year around from students needing a place to live. About 90 percent of Malykont's business is from students, she said, but she will rent to

anyone.

There are numerous places students can go to look for rental lists besides a property management company. The Web site **Slorentals.net** lists numerous helpful sites for housing. It gives everything from property management lists to help finding a roommate. Many of the rental lists are updated daily throughout the year.

The classified ads in any newspaper will list apartments, condos, houses and rentals to share.

Downstairs in the University Union, there is a large housing billboard that lists houses for rent, rooms for rent and roommates wanted. Currently, there are 12 listings for housing.

The most important thing to remember when trying to rent a house is the application.

One of the main problems Malykont has is that students' rental applications aren't complete. The major thing people don't list is also the most important.

"Make sure you have your prior tenant's phone number listed," she said. "We do call references, and we notice that lacking most of all."

Malykont said the main problem is that everybody wants a house, and there just aren't that many. She suggests that if students are seriously looking, they should find a house they like and stay with it.

"Be tenacious," she said. "Once you start tracking a list, stay on it. Have your application filled out and ready."

**Many students hope to find a house, like this one, to rent. Competition for rental housing is stiff, and students must act quickly and persistently to find one and keep it, said one property manager. Housing listings can be found in newspaper classified ads, Web sites such as Slorentals.net and downstairs in the University Union.**

# National study shows college crimes are up

(U-WIRE) WASHINGTON — Serious crimes on the nation's 6,300 college campuses are on the rise, according to a recent Department of Education report.

Hate crimes, robberies and sexual offenses are among the 250,000 reported crimes highlighted in "The Incidence of Crime on the Campuses of U.S. Postsecondary Education Institutions."

The Department of Education under former Secretary of Education Richard Riley prepared the Jan. 18 report to Congress.

"The purpose of the report is two-fold," said S. Daniel Carter, vice president of the non-profit watchdog group Security on Campus, Inc. "First is to inform students and parents of prospective students as to the dangers faced on college campuses. Second it is to convince schools that they need to make

changes in the way they train their officers, get better technology, better lighting, electronic locks, better policing."

In a letter to college presidents, the Department of Education said the public uses "the information to assess the institution's security policies and the level and nature of crime on its campus."

The report showed a slight overall increase in reported on-campus crime in 1999 from 1998 and a drop in murders and aggravated assaults. Increases fell in several areas, including drinking-related incidents.

"There are different factors that are faced in colleges rather than in communities," Carter told U-WIRE. "First is a concentrated use of high amounts of alcohol and drugs that the normal community doesn't deal with because normal communities couldn't with those amounts of alcohol."

Many American universities struggle with binge drinking — the excessive consumption of alcohol by students. The implications go beyond drinking, Carter added.

"Alcohol and violence have a direct correlation," he said.

The report cites some 108,846 incidents of alcohol-related referrals for disciplinary action in addition to the 25,933 alcohol-related arrests in 1999. Drug abuse increased 6 percent nationally.

The number of homicides dropped dramatically from 24 in 1998 to 11 in 1999, a 54 percent decrease.

Hate crimes increased from 1,374 in 1998 to 2,067 in 1999. The report attributes this increase to the increase of two-year for-profit institutions that "generally do not have police or security officers."

"It is important to collect these data

at an institutional level because violence motivated by hate or bias seriously threatens the values of the school and the larger community," the report said.

Despite increases in certain crimes, the report said students are safer on campus. Only 19 percent of the crimes reported occurred on campuses, while 72 percent occurred off or nearby institutional grounds.

The report is a result of two congressional acts requiring such data to be reported.

The 1990 Student Right to Know and Campus Security Act is now known as the Clery Act in memory of Jeanne Clery, a student at Lehigh University, who was sexually assaulted and murdered by a classmate in 1986. The Higher Education Amendment of 1998 also required a compilation of the data.

## Teen-ager recovering from burns after attempting 'Jackass' copycat

TORRINGTON, Conn. (AP) — A 13-year-old boy was hospitalized with second- and third-degree burns after mimicking an MTV personality who set himself on fire during a stunt show.

Jason Lind was severely burned Friday night when he and a friend poured gasoline on his feet and legs and lit him on fire while imitating a stunt on MTV's high-rated show "Jackass," police said. The fire grew out of control and burned the boy's legs and hands before it was extinguished, officials said.

Jason remained hospitalized Monday in critical condition in the burn unit of Shriners' Hospital for Children in Boston.

Jason's 14-year-old friend was

arrested Saturday and charged with reckless endangerment. Police would not identify the suspect because he is a juvenile. Another teen who looked on was not charged.

"Jackass" features an array of pranks and stunts. In Friday's episode, show creator Johnny Knoxville donned a fire-resistant suit hung with steaks. He then lay across a makeshift barbecue while his cast mates shot lighter fluid onto the grill to fan the flames.

One of the teens said Jason volunteered to re-enact the stunt, which took place in one boy's back yard.

A woman who identified herself as an MTV spokeswoman but would not give her name had no immediate response to the incident.

## Lift off.

Space Systems/Loral of Palo Alto is seeking May and June 2001 graduates to help build the next generation of telecommunications satellites. Lofted into high earth orbit on giant Atlas, Delta, Ariane and Proton rockets, these 5,000 kg machines provide a wide variety of essential communication services including telephony, paging, direct broadcast television, and CD-quality radio.

Space Systems/Loral is a great place to launch your career. All new graduates who are offered employment with SS/Loral are encouraged to enter the College Hire and Leadership Development Program, a two-year training and mentoring course that includes 4 different engineering assignments, classes on spacecraft design and space business, a mentoring relationship with a senior engineer, and regular social activities with your fellow recruits. Space Systems/Loral currently has the following opportunities:

## SYSTEMS ENGINEERING

Mass Properties Engineer  
System Test Engineer  
Telemetry & Command Databases  
Payload Systems Engineer

## ADVANCED SYSTEMS

Advanced Development  
Systems Analysis  
Communications Science  
Spacecraft Engineer

## Poly profs study new monorail

By Ryan Ballard

MUSTANG DAILY STAFF WRITER

Long recognized as offering one of the top engineering programs in the country, Cal Poly has attracted the attention of the Fresno Area Skytrain Committee.

The committee, lead by Deryl Bear, owner of Hungry Bear Cookies in Fresno, has asked several Cal Poly professors to conduct a six-month study to determine the viability of a monorail system in Fresno.

Alypios Chatziioanou, a professor of transportation engineering, is the principal investigator in the study. Also working on the project are Walter Rice, associate dean of the College of Business and professor Ed Sullivan of the civil engineering department.

The Cal Poly group is excited about the opportunity to conduct the study.

"I think it is a good projection of the Cal Poly image in many ways," Chatziioanou said. "We want to support, in general, public transportation. It also shows that Cal Poly's name is respected within the state and nationally."

The idea of a monorail system is not a new one. Las Vegas and Disneyland have monorail systems, but no U.S. city has a major system.

"It has been very popular in other places of

COURTESY PHOTO/FRESNO AREA SKYTRAIN

**The proposed central station of the monorail system would be placed at the location of the current Amtrak station in Fresno.**

the world, but in the United States, rail systems and public transportation in general are not a popular option," Chatziioanou said. "It's looking better and better as the way to go, but there is some resistance. If this can happen in Fresno, it can probably happen anywhere."

While the concept of a monorail in Fresno is an interesting one, there is no guarantee that the concept will be possible. Quite a few factors must be weighed, including whether the citizens of Fresno like the idea of a monorail, and if so, for what reasons. The sheer magnitude of a project this size may not be

able to work in a city like Fresno.

"It may come out to be a negative study, saying that this may not work," Chatziioanou said.

Fresno is on the border of being large enough in population and having the population density to have a need for a light rail system, Chatziioanou said.

The current concept of the monorail system for Fresno is to have a main line running north and south through the downtown area, with the main station built where the Amtrak station currently stands. From there, a series of shuttle buses will run on several streets east

and west.

The Cal Poly group is in the process of organizing the feasibility study at present. The group will look at the demographics of the city to see if there is a need for such an expensive and complex system. Several focus group studies will be done to determine if the citizens of Fresno like the idea and if they think it's the best option for their town. The study will be conducted in the spring.

"This is an experiment in many ways, and if it works, a lot of other cities will see it as a good thing and try it on their own," Chatziioanou said.

## Duke may soon require laptops for undergrads

By Steven Wright

THE CHRONICLE

(U-WIRE) DURHAM, N.C. — As Duke University continues to integrate technology into campus life, administrators are considering mandating that all undergraduates own a computer by the fall 2002 and that all entering students thereafter own a laptop or a similar portable device.

Provost Peter Lange is also investigating the possibility of enacting a similar requirement for the graduate and professional schools. Lange and Office of Information Technology officials will spend the next 18 months finalizing the plan, which will include calculating the effect upon financial aid students, wireless implementation and technical support.

University administrators estimate that although an overwhelming majority of students currently own computers, they will want to find ways to help students who otherwise would not be able to afford a computer.

About 10 percent of the nation's colleges and universities currently mandate that students own computers, including the University of North Carolina at Chapel Hill. While UNC administrators call the program—which went into effect at the beginning of this academic year—a success, they admit the implementation was not without problems.

"It took us two-and-a-half years to get this off the ground," said Marianne Moore, UNC Vice Chancellor for Information Technology. "We had problems with the little things you never would have thought about." For instance, small desks could not accommodate laptops.

On a larger scale, many faculty members complained that UNC failed to provide the proper training on how to effectively use the laptops in their classes. Students complained they were not being taught how to use the laptops to their fullest abilities.

Lange said he hopes to use the next 18 months working to avoid such pitfalls and to create a way to train Duke's faculty on how to best use this new technology.

Administrators said they will also look at successful models such as the University of Michigan and Carnegie Mellon University. Those schools specifically required laptops as a means of cutting costs and advancing technological initiatives. Wireless connections are cheaper than other types of connections, which require more equipment and building renovations. By using beams and a local emitter, wireless technology eliminates the need for physical data ports.

University administrators have already begun implementing the conversion to wireless; transmitters currently exist in the Bryan Center and Perkins Library.

"What I'm seeing is we've got a strong infrastructure for the wireless support," said Mike Pickett, special assistant to the provost for academic technology. "In terms of our current network, it shouldn't stretch us past what we already have. There will be marginal additional work that will have to be done."

The potential laptop requirement is a part of the University's larger plan to boost the use of information technology in the classroom.

# Mission

LINEN & UNIFORM SERVICE

Mission Linen Supply, one of the largest privately owned companies in the textile rental industry, will be conducting on-campus interviews on February 6, 2001 to find bright, hard working graduates for our management training program. **Interviews February 6**

## Gore makes ties with UCLA

By Michael Falcone  
DAILY BRUIN

(U-WIRE) LOS ANGELES — Former Vice President Al Gore announced Friday he would soon begin an academic relationship with the University of California at Los Angeles, but information about what exactly his role will be is being kept in something of a lock box.

Though the details of the nature and duration of Gore's involvement with the university are still tentative, Barbara J. Nelson, dean of the School of Public Policy and Social Research, said Gore will have a teaching presence at the school, making regular interaction with faculty and possibly with students.

Gore will visit UCLA Wednesday to participate in meetings and a faculty symposium with Chancellor Albert Carnesale and Pediatrics and Public Health Professor Neal Halfon, among others.

In conjunction with Halfon, who is the director of UCLA's Institute for Healthier Children, Families and Communities, Gore's work at UCLA will be in the emerging academic discipline of family-centered community building.

The new approach to the study of communities integrates various areas of public policy, economics, social sciences and even architecture.

"(Tipper and I) have both made a strong personal and professional commitment to supporting and strengthening the family at a time of tremendous cultural and economic

upheaval," Gore said in an interview last week with The New York Times.

Nelson said Gore would be working extensively with the faculty involved with this new interdisciplinary approach to community development. Along with Linda Rosenstock, dean of the School of Public Health, and Arleen Leibowitz, SPPSR chair, Nelson will also meet with Gore to discuss the substance of his work.

"UCLA has on its own faculty probably the strongest concentration of experts in the combination of these fields of any major university in the country," Nelson said. "That's the reason that Vice President Gore chose to have this affiliation with UCLA."

The former vice president has had a long-standing relationship with Halfon and other members of UCLA's faculty, Nelson said.

Halfon, who originally founded the Institute in 1996, could not immediately be reached for comment.

According to its newsletter, the Institute is a program of the UCLA School of Medicine's Department of Pediatrics and the UCLA School of Public Health, with faculty participation from School of Public Policy and Social Research, the School of Law and the College of Letters and Science.

The Institute's goal is to improve "society's ability to provide children with the best opportunities for healthy and well-being and the chance to assume productive roles within families and communities," according to its Web site.

The addition of Gore to the campus community will not only make him the second former Democratic nominee to join the ranks of UCLA scholars but also the second man who lost the presidency to a member of the Bush clan.

The first, visiting professor and former Massachusetts Gov. Michael Dukakis currently teaches one undergraduate class on California public policy issues and a graduate level class on bureaucracy and public management.

Dukakis said Gore and his wife, Tipper, have long been interested in family and community issues.

"(Gore) is as committed as I am to encourage young people to go into public service, and the more campuses he can touch the better," Dukakis said.

Several major newspapers reported last week that Gore already accepted teaching posts at three campuses: Columbia University in New York, Middle Tennessee State University and Fisk University — both located in Tennessee.

In the Jan. 25 New York Times, Gore did not say whether or not he would make another venture into politics anytime in the future but did sound enthusiastic about his new academic involvement.

"I've always wanted to try teaching and I'm particularly excited about teaching these courses on community building because it's something new to me and very exciting," Gore told the Times.

## More survivors found in Indian earthquake rubble

BHUJ, India (AP) — The discovery of a living 8-month-old baby — covered in his dead mother's blood, but cradled in her lap — on Monday captured the heartbreak and the singular miracles of India's killer earthquake.

The rescue was rare cause for hope following the earthquake, which killed at least 6,200 people and as many as 20,000 — or more. Damage was estimated at up to \$5.5 billion. India's prime minister acknowledged Monday that his country was ill-prepared for disasters.

In the case of the miracle baby, doctors said the warmth of his mother's body helped him survive three days in the ruins of a collapsed building in Bhuj's Kansara Market.

"We saw the baby in the mother's lap, we saw some movement from the baby," said R.K. Thakur, a Border Security Forces assistant commandant. "I took the baby in my hand and I found it was alive."

The boy, Murtza Ali, was rushed to a medical center, surviving relatives were found and the child was conscious and smiling, Thakur said, adding: "It was miraculous."

There are few even partly happy endings in western India these days.

Survivors complained Monday that confusion and a lack of equipment was hampering rescue efforts. Rescuers lacked cranes and bulldozers, and many units did not even have generators, making night work impossible without lights. Soldiers hunting for survivors began work at first light and stopped when the sun went down.

The hope of finding many more sur-

vivors "is dwindling hour by hour, but as long as there is hope, we won't give up," said Joachim Ahrens, who represents a Swiss rescue team in Bhuj.

In the first estimate of damage, the Federation of Indian Chamber of Commerce and Industry Secretary General Amit Mitra said quake losses may be as high as \$5.5 billion besides a daily production loss of \$111 million. However, officials in Gujarat state, epicenter of Friday's magnitude 7.9 quake, put the figure at \$2.17 billion.

A grim-faced Prime Minister Atal Bihari Vajpayee, who toured Gujarat on Monday, said he was forming a national disaster agency to ensure immediate response to emergencies.

"The country is not ready to face such disasters," Vajpayee told reporters in Ahmedabad, Gujarat's economic hub. He also announced federal grants totaling \$108 million for the state.

The prime minister noted that when a cyclone killed 10,000 people in the eastern state of Orissa two years ago, his government had trouble responding. He said it was facing similar problems now.

"I'm here to express my solidarity with the Indian people," Vajpayee said. "They are not alone in this."

In New Delhi on Monday, Agriculture Minister Bhaskar Barua appealed to private aid groups for field hospitals, clothing, volunteers to put up tents and prepare and distribute food, and cranes and other equipment.

On Sunday, Barua said it was the policy of his government not to ask for foreign aid. But he said India was thankful for the foreign help it had been offered.

## TOURNAMENT

continued from page 1

"If a person experiences depression in his 20s and it is properly treated, they are much more likely to recover from the disease," Goshen said.

Last year the Volleyball Challenge, which features separate faculty and student divisions, raised \$720 exclusively for depression education, said Martin Bragg, director of Health and Counseling Services.

This year the cost is \$60 for each six-member team. Faculty and staff will play at noon, while fraternities, sororities and campus clubs will begin at 6 p.m. Team registration is now open at the Rec Center.

"Although students have traditionally participated with campus clubs, the tournament is open to anyone," Negranti said. "All students are encouraged to play and we'd love a big turnout."

For more information, contact Joe Long at 756-1366 or Vivian Phillips at 756-5279.

## CHAT

continued from page 1

you started talking to them, don't give out your full real name, and most importantly, don't give away your home address," Martin said.

People are sometimes in chat rooms and are having a good time chatting with someone, but they don't realize that the person on the other side of the computer could be lying about themselves. Chatters should also refrain from giving their home or work numbers to anyone, especially in a chat room, Martin said on her Web site.

"The only time I've chatted with someone online was with my friends," said business senior Nicolene van Niekerk. "We lied about ourselves and played jokes on people."

Niekerk said she would never meet anyone she talked to on the Internet because she doesn't have an impression of them.

"There are things about a person's personality that come out when talking to them in person," Niekerk said. "You can't determine that on the

Internet."

According to Martin's Web site, anyone could be in a chat room, from rapists, murderers or stalkers, and they could use information given out by chatters.

"I have a friend who met the person she talked to online," Niekerk said. "We all told her it wasn't a good idea, but at the same time she started rebelling in all aspects of her life and met that person."

There is a safe way to meet people in person when chatting with them on the Internet. If chatters decide to meet in person after writing for about six months, they should meet in a very public place, Martin said. They should also bring a friend along and have a backup plan if the person doesn't seem safe.

"I think it's stupid to meet someone online," said Viren Patel, an ornamental horticulture senior. "Don't just sit in front of the computer all the time; go out there and meet people."

# Opinion

## Virginity is all it's cracked up to be, isn't it?

Virgins have become somewhat of a myth, like unicorns or honest politicians. They do exist, but it's getting harder to make generalizations about them. The word itself calls to mind a young blushing maiden, unfamiliar with the ways of love and the world. But today's virgin is anything but naive. Society as a whole is obsessed with sex. Big surprise. Yet recently, we focus on those who go without it. Books are written about virgins. Then those books are made into Kirsten Dunst movies that detail the beautiful mystery that is chastity.

Even celebrities like to say that they too are indeed "pure." I have seen few things more ridiculous than Jessica Simpson, except perhaps her questionable devotion to virginity. But she also praises ...

### Shallon Lester

farting. And burping. Ah yes, if these aren't the mark of a true lady, then I don't know what

is! She can love to fart but not get freaky?

Personally, I'd rather get it on then let one go. But that's just me. Then the tan and bedazzled Britney Spears also claims chastity until marriage. Is it all part of her meticulously crafted image of the ultimate virgin whore? Shrewd move Brit, because most girls know that not giving it up winds men tighter than a nun at a prison rodeo.

"It gives me a sense of immortality," said my friend Zack about the virgin mystique. "They're going to remember me for the rest of their life, no matter how bad the sex was!"

Reach for the stars, Zack. But his statement gets to the heart of the obsession; that you are guaranteed not to be forgotten. Isn't that the true beauty of love, that it springs eternal? Men can't always wiggle their way into a woman's heart, so some set about wiggling into her pants!

But let's not shame men for their craftiness and pride. Even we women must admit that being the one to defile a boy gives us a thrilling sense of role reversal. To claim something that has been 15 to 20 years in the making is fabulous. And it is just as exciting to give it away. So when is that magical moment, when you are relieved of your virginity and say hello to womanhood? Is it merely technical intercourse? I don't think so. Friends never really believe that I've not done it, maybe because I've kissed over 30 guys.

But am I missing out? My sex life is fantastic without actual sex. I think that to lose one's virginity is more than just a physical act. It is giving your body your heart and your trust. My waiting has nothing to do with religion or my parents. I simply want it to be ... special. Meaningful. Frequent!

I want to know that the boy I lay with, I will wake up to, both the next day and many days to come. But again, that's just me. There are a million other people with a million other reasons, all equally valid. My future sex partner is out there. He may be reading this right now. Oh, I'll find you! Baby, here I come ... (wink wink)!

Shallon Lester is a speech communication sophomore.

## Hackers should be encouraged

Earlier this month, the FBI reported that the number of cyber-crimes under investigation has tripled since 1998. Due to the increase, officials have launched a nationwide program to fight cyber-vandalism.

Doing the opposite is Argus, a company that wants to be attacked. The company is going to pay \$50,000 to the first hacker to get through its software.

Argus and many other companies are smart for sponsoring such contests and events. For companies, contests like these are a way of working with the problem instead of against it. Finding defects in other people's work is how the world works. It is the only way to get real progress.

This way of getting improvement is used everywhere. Police use ex-thieves and robbers to learn how they circumvent car and home security systems. That is why the new Club attaches to the gas-pedal instead of the steering wheel.

In science, this is how we get closer to the truth. A scientist publishes research results, and the rest of the scientists try to null it. Every aspect of the thesis is dissected and questioned. If scientists find any error or discrepancies in the manner in which the results were produced, they do their own research on the subject and the cycle continues.

There have always been individuals who question and want to make things better. Common hackers probably just

think about the chaos they produce. They don't know about the bigger service they do to companies; they keep them on check and make them strive to make a more secure system. Hackers help the technological world become more secure for Web consumers and Web surfers.

Hackers shouldn't be discouraged. Collective talent and intelligence is lost when there are 14- and 15-year-old children punished for hacking into government computers. These children's intelligence should be honed and nurtured, not pulverized. Intelligent people like these shouldn't be expected to play by the same rules as everyone else. They should be given slack.

The first hackers in the '80s have become the CEOs of the larger computer and software companies. The products they have created have propelled the United States to become one of the

leading technological countries in the world.

In the end, the hacker really doesn't bother anyone. It is really only large corporations and the government that have a problem with them.

Even though people might not think of hackers as useful, they have their place. They are inadvertently making the companies produce better-quality products. That benefits all of us.

After the two weeks of this contest, Argus will have information on the effectiveness of their security software. They will be able to make changes and make an even better program.

In everyday life, we accept too many things on face value. The hackers force companies and ourselves not to accept "good enough."

Byron Samayoa is an ecology and systematic biology senior and Mustang Daily staff writer.

# Don't punish party hosts for wrongs of underage drinkers

Imagine being cited for being host to a party that included alcohol and random people, mostly underage drinkers, who showed up uninvited. Like most parties, it got out of control and the cops showed up.

Being the host for a party isn't always an easy task. Not only does the

**Commentary** host have to be aware of who's doing what at the party, but there's always fear of the police showing up.

It's not the host's job to check identification cards for every person that enters through their door. Not only is the host not well-skilled in checking for fake identification, but it's not their job to be the law enforcer for underage

drinking. Most people who have parties at their houses don't always have alcohol, but the people who crash these parties usually bring the alcohol without the host knowing about it. It shouldn't be the host's responsibility for the alcohol that was brought into their party, and, therefore, the host shouldn't be cited for it.

The City of San Luis Obispo is proposing to cite homeowners who have anyone under the age of 21 drinking alcohol at that location. The Alcohol Ordinance states that it is unlawful for any person to permit or host an event at his or her place where five or more people under the age of 21 are present and alcoholic beverages are being consumed by three or more people. So much for fraternity and sorority

parties, which consist of nothing but under-21-year-olds drinking and trying to look cool. Does this mean that every fraternity or sorority will be cited for having a party? Some fraternities that I know of have guest lists, but they still consist of minors drinking.

The police need to take action against underage drinking. They may be doing their best to develop a solution to this problem, but citing homeowners is not the answer. The police have always been there to break up parties, but this time it will be different. The officers who were either called by neighbors or happen to be driving by the party, will check for underage drinking and cite the host \$100 for the first offense, \$300 for the second and \$500 for the third.

This ordinance needs to address the real problem of underage drinking. Police shouldn't cite those homeowners who are over 21 and can drink. The police department needs to do something about those who just show up at the party with their own alcohol. The officers need to not only cite those who are under 21 and drinking but need to come to the realization that the homeowner is not a police officer and will not do their job for them.

If I'm host to a party, I will not stand by the door and check every single person's ID card to make sure that they are over 21. I am not a bouncer at a bar and don't know for sure if an ID card is fake or not. It seems outrageous to let such an ordinance pass. If this does go through it will mean the end

of parties. Who's going to host a party knowing that anyone can show up – as well as the police – and get cited for it.

I'm sure many students oppose this Alcohol Ordinance, and do not want the host to be fined for underage drinking. There will be an ASI meeting tomorrow evening regarding this resolution in the University Union, room 220, at 5:10 p.m. Come to the meeting and state your opinions to the Board of Directors. You have a voice in this school and by coming it will be heard and taken into account.

## Letters to the editor

### Don't misunderstand evangelism

Editor,

Evangelists. Not another one of those freakin' evangelists. TESTIFY!

There are a lot of words that have bad connotations. Lets see, hemorrhoid, root canal, midterm. The word evangelism has a bad connotation.

As you read this, you have to admit that you have visions of Steve Martin in Leap of Faith in your mind, or perhaps 11 a.m. Sunday programs with pastors running around alters flailing their arms.

The term evangelist refers to "one who proclaims good news." Do you remember those guys in the University Union with the 20-foot signs screaming at the top of their lungs, telling us that we are going to burn? "Sinners, repent! Homosexuals, adulterers, weak-necked cowardly men, repent or die!"

Well, let me tell you those men are NOT evangelists, misguided at best. They didn't spread the good news.

What is good news? Well, the good news is that God sent his son Jesus Christ down to earth to die for our sins, and those who believe in Him will have eternal life with God. Not only is that cliché, but it is truth as well.

Finally electing a president is good news, too. Hey, it's good news when the copy machine actually works upstairs in the U.U. But the good news about Christ that evangelists proclaim is the best news I've ever heard. It changed my life. Ask me about it if you see me.

You know that feeling you get when you see the GREATEST movie you've ever seen in years in the theater and you want to take all your friends to watch it so they can experience it, too? That's what sharing the good news is like. You want them to experience the joy and excitement that the movie brings.

That is what evangelists do. We might cross a fine line of "pushing our beliefs on others," but it's all

for the love, folks. I would use the word "offering" rather than "pushing." It's been said, "Sometimes people don't care what we know until they know that we care."

Andre Niesing is an architecture senior.

### An American journalist in Paris

Editor,

After studying in France for five months now, the one thing I've gotten used to – besides countless hours of chatting over cafés – is to continually make a fool of myself. I suppose it's a given when learning a new language, but when conversations with aspiring French law students begin with – and I swear I'm not making this up – "How do you believe the recent election of your president will affect the foreign relations with Europe?" it is almost impossible to struggle through the conversation without admitting, sadly, that I have no idea.

Even more than the mystery surrounding California's beaches and glamorous culture, the French – all Europeans, actually – love to discuss American politics.

I've been warned about this, of course, but never gave it a second thought until I decided to study in France during an election year and through the messy aftermath that followed the results (or lack of them). For about two weeks, my professors would begin class by sarcastically inquiring whether the Americans had chosen a leader yet. And when the "comédie à Floride" was finally finished, the same instructors made no secret of their disappointment in the outcome.

They are just waiting for Monsieur Bush to make a mistake, and I know he does not stand a chance against their beloved Clinton, who they say attached strong foreign relations with Europe, despite the scandal that clouded the second half of his presidency.

Fortunately, the French differentiate between politicians' political views and their private lives –

secret affairs have nothing to do with decisions made inside their political arena. As my German friend Yara commented: "The European papers about the Lewinsky scandal didn't take it seriously. We didn't think, 'Oh, no, what did Clinton do?' We thought the affair had nothing to do with his politics." As she later informed me, the American view is almost naïve – all politicians have affairs, didn't I know that?

But my point is not to say that Europeans dislike the American culture. They run around wearing Eastpack backpacks and shop at the local Gap just like I do. And, although a few would hate to admit it, they would love to visit the United States and find the American dream for themselves.

Ludo, a French friend of mine from Marseille, just purchased a plane ticket to San Diego to fulfill that purpose. It will be his first

time in California, and I like to let him believe that the state is just a 1,200 mile-long beach where we all drive our Boxsters down Sunset Boulevard, clad in bathing suits with our surfboards sticking out of the sunroof, year-round. He may be in for a surprise, but as I've learned here, "C'est la vie!"

Cynthia Neff is a journalism junior who is currently studying French in Aix-en-Provence, France.

# Davis leaves Miami for Browns

BEREA, Ohio (AP) — Butch Davis, who brought Miami football back to national title contention, resigned Monday to coach the Cleveland Browns, a university spokesman said.

Davis, who led the Hurricanes to a No. 2 ranking last season, will be hired as Chris Palmer's successor, Miami spokesman Doug Walker said.

WKYC-TV and WTAM-AM in Cleveland first reported that Davis would take the Browns job.

His agent, Marvin Demoff, said Davis had not yet signed but the sides were "in serious discussions. It's pretty close."

The Browns said team president Carmen Policy would have a statement during the afternoon. Policy canceled a conference call to discuss the coaching search. Miami scheduled an afternoon news conference.

Davis was said to be atop Cleveland's wish list since the team fired Palmer on Jan. 11.

For weeks, Davis has been denying he would leave Miami, where he had been working on a contract extension with the university. The Browns also denied having met secretly with Davis in Florida.

Walker said Davis told the Hurricanes' players of his decision Monday morning and was headed to Cleveland. His departure comes one week before the end of the college signing period.

Just last week, the Browns said they were focusing their search on NFL assistants, all but ruling out the possibility of hiring Davis, Oklahoma coach Bob Stoops or Washington coach Rick Neuheisel.

Browns owner Al Lerner shot down reports Davis was coming to Cleveland, saying, "There is no Butch Davis."

Davis, 49, was in the fourth year of a seven-year contract at Miami and had nearly agreed to a five-year extension at the university. Davis met with Paul Dee, Miami's athletic director, last weekend and said the sides only had to work out a few details on the contract.

Davis, who interviewed for the expansion Houston Texans' head coaching job, had reportedly lost interest in pursuing a job with the Browns because he would not have full control of football operations in Cleveland.

Dwight Clark is in charge of personnel decisions with the Browns, but Davis' hiring could indicate a reshuffling in the Browns' front office.

The Browns' coaching search is ending just when it seemed to be picking up steam. The club had asked

for permission to speak with Super Bowl defensive coordinators Marvin Lewis of Baltimore and John Fox of the New York Giants this week. Both coaches were scheduled to visit Cleveland in the next few days.

The Browns interviewed three assistants last week, including defensive coordinator Romeo Crennel, but were thought to be leaning toward Lewis, who guided the Ravens' record-setting defense and is the front-runner to replace Wade Phillips in Buffalo.

Davis has coached the Hurricanes since 1995. He turned around Miami's troubled program after it was hit with numerous NCAA violations.

This season, he led the Hurricanes to an 11-1 record and 37-20 rout of Florida in the Sugar Bowl on Jan. 2.

## WRESTLING

continued from page 12

best match of the night," Cowell said.

While the victory proved the team is moving in the right direction, there is still more to be improved on before the Pac-10 Tournament, to be held Feb. 23-24.

"We need to wrestle with more confidence, continue to improve our conditioning and wrestle with the intensity we need to," Cowell said.

With the victory, the Mustangs picked up their first home win of

the season and third overall after some early struggles against ranked opponents.

"We've been very competitive lately, but had some tough losses," Cowell said. "This should give the team more confidence. Wrestling is all about match-ups. It's your tough guys wrestling against their tough guys."

The Mustangs took on Portland State Monday night at 7 p.m, but results of the match were not available at press time.

what kind of offensive sets the team is seeing. She said that she tries to prepare the team for what they need to do to be successful.

"I always tell my players that preparation prevents panic," Mimnaugh said. Thus, during the game she tries to prepare the team for every possible situation so they are not hit by surprise.

Mimnaugh does a variety of things during a game. Circumstances are constantly changing, such as fouls and mismatches.

"There are a zillion decisions to make in a course of a game," she said.

One scenario that she gave was if the team goes into a game with an opposing team that hasn't won a game yet. As Mimnaugh said, that team has nothing to lose, so she doesn't want her players to be overconfident, but she wants them to have a

The first session meets Tuesdays at Dairy Creek Golf Course, beginning today, from 1 to 3 p.m. The second session meets Thursdays, beginning this Thursday, from 1 to 3 p.m. Students interested in participating can register at the Rec Center front service desk.

certain level of confidence.

"In a situation like this, it is important how my demeanor is and what kind of confidence that I exude," she said.

Mimnaugh said that there are very few times that she has lost her cool, and that she doesn't ever want that to happen.

"She is such an intense person as a coach," said Kate Valdes, a freshman forward. "During the game, you can see in her eyes that she is totally into it."

Another situation that Mimnaugh faces during a game is if a player has had too many fouls in the first half. She must make the decision if she should substitute her, or she has to take a chance and leave them in the game. At this point, she has the choice to either back off their defender or keep fouling, and in that case, the player could foul out of the game.

After the game, Mimnaugh spends the time talking with the players about whether they were successful on the court. She tries to highlight the areas of improvement or those that need work.

"You want to give them something to feel good about, but you also want to give them something to continue to work on to be a better basketball team," she said.

The program is still young, and Mimnaugh said she has seen great improvements over the course of the year and during games.

"When you get players that give their best effort every day, then it is fun to coach," she said. "We keep working toward the wins; the losses are always disappointing, but not quite as disappointing when I see the effort by the players."

## Lighting the fire

Head coach Faith Mimnaugh has many preparations on game day

By April Pack

MUSTANG DAILY STAFF WRITER

Game day is a day that brings excitement, sweaty palms, victories and defeats.

It is a day that Faith Mimnaugh, head coach of Cal Poly women's basketball team, reflects on improvements made and challenges ahead.

"I get just as excited about the game as the players do," Mimnaugh said. "I spend some time working on that excess energy, so I start out the day in the Rec Center," she said.

Junior guard Odessa Jenkins said she believes Mimnaugh is the same kind of coach that she was a basketball player.

"She is very emotional and passionate about the game, even though she tries not to show it," Jenkins said.

A typical game day for the women's basketball team begins with reviewing videotapes then devising the game plan. Mimnaugh said this is used to get some things into the players' heads about what is expected of their opponents and how they are going to handle situations. This is also a time that players get personal counsel, if needed, about what it is they need to work on.

Before the game, the team also reviews some of their opponents' plays. "This is a day where we are focusing mostly on what the opponent is going to be doing," Mimnaugh said.

At 6 p.m., it's game time. Mimnaugh begins her game by jotting notes on a clipboard as refreshers about

## Wrestling tops No. 12 Oregon

By Ryan Ballard

MUSTANG DAILY STAFF WRITER

Led by a comeback victory from David Schenk, the Mustang wrestling team knocked off No. 12 Oregon Sunday night by a score of 23-20.

In the first match of the evening at 197 pounds, sixth-ranked Chael Sonnen of Oregon was on his way to an easy victory, with an 11-0 lead, when David Schenk quickly scored an escape and took Sonnen down to his back, recording the pin at 2:31.

Eleventh-ranked Cedric Haymon recorded his team-leading 23rd win with an 8-0 major decision over Oregon's Tony Overstake at 149 pounds. Freshman sensation Brody Barrios continued to be impressive for the Mustangs at 165 pounds, winning 8-1 over Luke Larwin.

Steve Strange dominated Leif Williams from the start at 174 pounds, scoring a major decision, 11-2. Jaime Garza won by forfeit at 125 pounds.

Head coach Lennis Cowell was pleased with his team's performance.

"I was happy with the whole team effort, but obviously for anyone there, David Schenk had the

## Students get a chance to learn golf from pros

By Nicholas Carter

MUSTANG DAILY CONTRIBUTOR

Students who think their golf skills are not up to par will now be able to improve their game, with a little help from the pros.

Associated Students Inc. and Rec Sports will offer instructional sessions at Dairy Creek golf course for non-golfers interested in learning the sport.

Financing for the program comes from a \$50,000 grant from the Professional Golfer's Association of

America. The PGA distributed \$2.6 million to a number of charities and universities throughout the nation on behalf of American participants in the 1999 Ryder Cup matches.

Each player on the U.S. team designated \$100,000 to charities of his choice. Another \$100,000 per player was donated to the university of his choice in support of a PGA of America Growth of the Game initiative. Ryder Cup team member Tom Lehman donated half the money to his alma mater, the University of Minnesota. Cal Poly, of which his

wife is an alumna, received the other half.

The program, according to the PGA, is designed to acquaint students with the opportunities that golf provides as a business tool and as a sport for life.

Local PGA professional Jim Coles, who is the director of instruction at Dairy Creek and Morro Bay golf

courses, will teach the golf lessons.

Another local PGA professional, Rudy Duran, has worked with the university and ASI to coordinate the program. Duran, who owns and operates Chalk Mountain Golf Course in Atascadero and The Links Course in Paso Robles, said the program will be a good experience for students, regardless of playing ability.

"It's going to be a lot of fun and the students will learn a lot of life skills," he said.

Nancy Clark, fitness program coordinator for Rec Sports, hopes to

run the program as long as possible.

"We're planning on running it each quarter until the money runs out," Clark said. "I anticipate that we should be able to do this three quarters a year for the next four years."

The program is divided into two seven-week sessions. Class size is limited to 20 students and costs \$20 per session. Fees include professional instruction, green fees and a course manual. Golf clubs are available for class members to check out at the
